

MEHBIN A C

Trivandrum, Kerala | +91 9895652998 | mehbinac@gmail.com | [linkedin.com/in/mehbinac](https://www.linkedin.com/in/mehbinac)

Summary

CS undergraduate focused on AI, machine learning, and applied problem-solving across computer vision, classical ML, and generative AI. Experienced in building end-to-end ML pipelines, creating production-ready datasets, and experimenting with real-world applications. Strong leadership track record through managing technical communities, coordinating teams, and executing large-scale initiatives.

Work Experience

Campus Lead - μ Learn, College of Engineering Trivandrum

September 2025 - Present

- Designed and led peer-based learning initiatives tailored to what genuinely works for CET students, aiming to build an ecosystem where continuous learning is naturally embraced.
- Guided the team to execute initiatives that strengthened their skill growth while driving community impact, contributing to CET being recognized as μ Learn's Top Emerging Campus.

AI/ML Intern - Cognifluenze Deeptech

June 2025 - July 2025

- Worked on a 3D reconstruction pipeline focused on reducing reconstruction time and improving overall processing efficiency.
- Optimized pose-estimation and point-cloud generation stages to improve the smoothness of the single-camera pipeline.

Interest Group Management Associate - μ Learn Foundation

January 2025 - Present

- Facilitated interest-aligned learning groups and strengthened collaboration and documentation practices across teams.
- Redesigned Office Hours and Think Tank sessions to better fit audience needs while improving mentor-student interaction.

Operations Manager - μ Learn Foundation

May 2024 - December 2024

- Managed cross-functional operations to ensure smooth program execution and better team alignment.
- Designed engagement-focused learning initiatives and strengthened documentation workflows to improve clarity and collaboration.

Projects

BOLT INSPECTION SYSTEM — GENROBOTICS

2025 - Present

- Built, annotated, and standardized a custom bolt dataset using CVAT for YOLOv8 segmentation and defect detection.
- Developed and tuned a production-aligned model for bolt-defect detection across various failure types.

3D RECONSTRUCTION PIPELINE (INTERNSHIP PROJECT)

2025

- Implemented structure-from-motion workflows using ORB matching, epipolar geometry, and multi-view triangulation.
- Generated and analyzed point clouds using geometric reasoning to derive depth and spatial scene structure.

EVENT MANAGEMENT PLATFORM — SARGAM CET

2023–2024, 2025

- Handled and processed event data for 100+ cultural events, including scoring, results computation, performance tracking, and real-time information flow across venues.
- Showcased in GDSC Solution Challenge 2024 and re-engineered for Sargam 2025 with improved performance and data workflows.

Skills

- Technical: C, Python (NumPy, Pandas, OpenCV), scikit-learn, Basic Deep Learning (PyTorch/TensorFlow), DSA, OS
- Tools: Google Colab, GitHub, Notion, Excel, Google Docs/Sheets
- Core Competencies: Problem-solving, Research mindset, Team leadership, Adaptability

Educational History

B.TECH COMPUTER SCIENCE AND ENGINEERING

College of Engineering, Trivandrum

2023 - 2027

Courses & Certifications

- CS50: Introduction to Computer Science, Harvard University
- CS50 AI: Introduction to Artificial Intelligence using Python
- Introduction to Generative AI, Google
- Gen AI Bootcamp by Pathway and μ Learn Foundation
